

BIKASH RANJAN DHIR

DATA SCIENCE

bikashranjandhir@gmail.com | [LinkedIn](#) | Bhubaneswar, India

SUMMARY

Data Science student (GPA: 8.2/10) with hands-on experience in machine learning, deep learning, and statistical analysis. Built multiple ML projects including CNN-based image classifier and regression models. Proficient in Python, SQL, and modern ML frameworks. Seeking to apply analytical skills and technical expertise to solve complex problems in a dynamic organization.

EDUCATION

Siskha 'O' Anusandhan

09/2023 – Present

B.Tech (CSE – Data Science) — GPA: 8.2 / 10

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Statistics, Database Management

Basic Science And Humanities H S School

03/2021 – 03/2023

12th — Percentage: 69.5 / 100

Saraswati Sishu Vidya Mandir, Unit-8

03/2017 – 03/2021

10th — Percentage: 85 / 100

TECHNICAL SKILLS

Programming Languages: Python · Java · SQL · C · R

Machine Learning & AI: Scikit-Learn · TensorFlow · Keras · CNN · Regression Models · Classification · Deep Learning

Data Analysis & Visualization: Pandas · NumPy · Matplotlib · Seaborn · Plotly · Power BI · Data Cleaning ·

Feature Engineering

Data Engineering: Snowflake · dbt Core · Airbyte · ETL Pipelines · Data Warehousing

Databases & Tools: PostgreSQL · MySQL · Git · GitHub · Jupyter Lab · VS Code · Google Colab

Statistical Analysis: Hypothesis Testing · A/B Testing · Regression Analysis · Time Series Analysis

Core Competencies: Data Preprocessing · Model Evaluation · Hyperparameter Tuning · OOP · Algorithm Design

Soft Skills: Problem Solving · Communication · Team Collaboration · Presentation Skills

PROJECTS

End-to-End Retail Analytics Warehouse | *Snowflake, dbt Core, Airbyte, SQL, Python, Power BI (Group Project)*

Built an enterprise-grade retail analytics and business intelligence platform, transforming raw transactional data into an analytics-ready warehouse. Designed ELT pipelines using Airbyte for data ingestion and dbt Core for modular, tested data transformations into Snowflake. Developed dimensional data models and automated data quality checks to ensure reliability across the pipeline. Created interactive Power BI dashboards enabling executive-level insights into sales trends, customer behavior, and inventory performance. Collaborated with a team using GitHub for version control and CI workflows.

House Price Prediction | *Python, Scikit-Learn, Pandas, Regression Models*

Developed machine learning model to predict house prices using Linear Regression, Random Forest, and XGBoost algorithms. Performed comprehensive data cleaning, outlier detection, and feature engineering on 10,000+ property records. Achieved 87% prediction accuracy through cross-validation and hyperparameter tuning, improving baseline model performance by 15%.

Image Classification With CNN | *TensorFlow, Keras, Python, Deep Learning*

Built Convolutional Neural Network for multi-class image classification on dataset of 5,000+ images.

Implemented data augmentation, preprocessing pipeline, and custom CNN architecture with 4 convolutional layers. Achieved 92% accuracy on test set with precision of 0.89 and recall of 0.91. Applied transfer learning and regularization techniques to prevent overfitting.

Bank Management System | *Python, OOP, Data Structures*

Designed and implemented object-oriented banking application using Python with classes, inheritance, encapsulation, and polymorphism. Created features for account management, secure transactions, balance inquiry, and transaction history tracking. Handled 100+ concurrent user accounts with proper data validation, error handling, and file-based persistence system.

KEY ACHIEVEMENTS

Accenture Software Engineering Job Simulation (Forage) – June 2025

Completed hands-on tasks in software architecture, security best practices, programming, testing methodologies, and Agile/Scrum frameworks through real-world project simulation.

Deloitte BRIDGE – AI Agents in Action (2025)

Attended Campus Learning Series gaining practical insights into AI agent systems, intelligent automation, and real-world applications of artificial intelligence in business environments.

Deloitte Data Analytics Job Simulation (Forage)

Gained hands-on experience in data analysis techniques, data visualization, forensic technology applications, and business intelligence tools through industry-focused simulation exercises.
